**Summer 2023-Present**

- Responsive CV website built from scratch using no pre-built libraries and industry best practices

**LLVM Compiler (Class: [Compiler Construction](#))**

**Winter 2022**

- Built an LLVM→Assembly compiler in C++

**Story Painter (Class: [Practicum in Intelligent Information Systems](#))**

**Fall 2022**

- Collaborated on a team of three people to create a system that takes in a short story and outputs a picture book that fits the story
- Built as a web app using Flask, a python framework
- Created a custom training data set of >50 examples of turning paragraphs with varying lengths into lists of phrases for sequential image generation
- Used OpenAI's public API to fine-tune OpenAI GPT-3 model using their public API with this custom data, query the fine-tuned model, and feed its output into DALL-E 2 to generate novel and relevant picture books
